**DETAILED ACTION**

***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

**Group I**, claims 11-14 are drawn to a fluid dispensing container and a process for preparing the fluid dispensing container comprising a dispensing pump, a fluid product and at least one low-boiling liquid.

**Group II**, claims 17-20 are drawn to a fluid dispensing container and a process for preparing the fluid dispensing container, consisting essentially of a dispensing pump, a fluid mixture which comprises active product and at least one low-boiling liquid, optional additives, and optional base support products.

**Group III**, claims 21-24 are drawn to a fluid dispensing container and a process for preparing the fluid dispensing container, consisting of a dispensing pump, active product and at least one low-boiling liquid, optional additives, and optional base support products.

**Group IV**, claims 25-28 are drawn to a fluid dispensing container and a process for preparing the fluid dispensing container comprising a dispensing pump, a fluid product and at least one low-boiling liquid wherein no component having a boiling point less than 15 °C at 760 mm Hg is present. .

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The fluid dispensing container listed as claims 1-24 are not novel. See Nakajima *et al.* (GB 1,537,436). Therefore there is not a special technical feature present which links the claims as defined by PCT Rule 13.2. Accordingly, Groups I-IV are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept
3. The election of an invention may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
5. A telephone call was made to Oblon's office on 11/17/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.
